

### Best Poster Presentation during the HMC Annual Research

CPH Assistant Professor, Dr Hazem Elewa, and his MSc student Loulia Bader won the Best Poster Award at the “Annual Research Day”, which was recently organized by the Medical Research Center at Hamad Medical Corporation (HMC). The project entitled “The effect of genetic and non-genetic factors on warfarin dose variability in Qatar Population” was conducted in collaboration with colleagues from Hamad Medical Cooperation and University of Florida in the United States.

More than 400 researchers and senior leaders from across HMC attended the health care provider’s annual research day that highlighted the impact of research in improving care for patients.

Dr Hazem Elewa said: “The use pharmacogenomics and precision medicine can play a major role in improving both efficacy and safety of medications. Events such the HMC annual research day allow researchers and clinicians to learn together to bridge the gap between research and innovation in patient care cross the country. Qatar University continues to support high-quality research that continues to gain international attention.”

Loulia Bader Commented: "Winning and Success are derived through a person's hard work, commitment, and sacrifice. Being acknowledged for success and winning this award is another great achievement added to my journey through the Master's Degree program in Qatar University".

Congratulations Dr Hazem and Loulia.
