Workshops

Projects

It's an awareness campaign organized by the Students Outreach and Support Committee in collaboration with Qatar green Building council in line with Qatar sustainability week.

The campaign aims to:

- increase the students knowledge about the concept of sustainability.
- motivate students to do activities related to sustainability as part of their daily lives.
- identify parties which students can continue with in the field of application of the concept of sustainability in a simple suit their lifestyle.

Barcode Competition

Participants barcode is a contest lasted three days. Students collect points through the health-behavior which helps to Sustainability

the winners of the barcode competition

Introduction to Sustainability

CSR Development in the Mideast Today, Mission Impossible

Our team in Qatar university football league

The University Football League that is being held traditionally every year for both students and staff, saw for the first time a team from the Management and Marketing Department competing. The debutant team comprised of the following players: Dr. Tamer El Sharnouby, Dr. Arsalan Safari, Mr. Maysarah Al Alami, Dr. Jaithen Al Harbi, Mr. Mohammed Raeisi, Dr. Anas Al Bakri, Dr. Othman Al Thawadi and Mr. Ammar Al Ismail.

Ten teams across the QU community were drawn into two groups and the road of DMM stars kicked off with a 7:0 win against the College of Sharia. After an impressive first win, a tight 2:0 loss against eventual winners Finance Department followed. Although

DMM was the better team throughout the game, inability to break Finance Department's defense lead to the first loss. The following two games against Gas Research Department and HR were characterized by absence of several players due to injuries hence both games were lost 3:6 and 0:3, respectively. In the final round, the team collected strength to bounce back up, and end the tournament with an 8:5 win over Sports Science Department.

Aside from having accomplished decent results in the debut season, the team showed great character and unity of all players. Building on these achievements, the team is confident that it can compete for the title in the following editions.

Dr Hassan Rashid Al-Derham
QU president

This initiative aims to link the university's subjects by the challenges that faced the State of Qatar in sustainable development which set out in Qatar Vision 2030.

I invite our students to contribute to find a solution of these local challenges. And to do not minimize their ideas. the idea starts small but will grow with the passage of time, make a difference, and transform the local community

Dr. Khalid Shams Al-Abdulqader
Dean of College of Business & Economics

Dr. Khalid Shams, the dean of business and economics college, attended the opening and closing ceremony and stressed the importance of sustainability in Qatar as one of the basic pillars of the Qatar National Vision 2030. He also commended the students and volunteer efforts in a green life campaign

Dr. Bader Al-Esmaeil
Head, Management and Marketing Department

very happy to see a lot of projects and programs designed to enhance students' interest in sustainable development. We saw many of the ideas here: as an idea of green buildings; ideas to reduce heat emission; ideas of healthy eating; an idea of spreading the culture of exercises; an idea of reducing the use of paper; an idea of recycling. We would like all of today's students to be familiar with these ideas because they will be the future leaders

Opening day

The opening of the «green life» campaign was on Tuesday, November 2016 ,14, in the presence of Dr. Hassan Dirham, President of Qatar University, Dr. Khalid Al-Abdul Qader, Dean of Business and Economics college, Eng Meshaal al-Shammari, Director of Qatar Green Building Council, and Dr. Badr Alasmael, Head of Management & Marketing department

Let the pictures speak louder

Hand in hand we maintain sustainability
of our environment
